# Chapter 1

## Hierarchical Index

### 1.1 Class Hierarchy

This inheritance list is sorted roughly, but not completely, alphabetically:

DyLib< T > . . . . .	7
DyLib< Arcade::IDisplay > . . . . .	7
DyLib< Arcade::IGame > . . . . .	7
std::exception	
Arcade::exception . . . . .	9
Arcade::DyLibException . . . . .	8
Arcade::MissingAsset . . . . .	13
HighScore . . . . .	10
Arcade::IDisplay . . . . .	10
Arcade::NCURSES . . . . .	14
Arcade::SDL . . . . .	17
Arcade::SFML . . . . .	20
Arcade::IGame . . . . .	12
Arcade::Pacman . . . . .	15
Arcade::Snake . . . . .	21
Arcade::IObject . . . . .	13
Arcade::DynamicTile . . . . .	9
Arcade::Sound . . . . .	22
Arcade::Text . . . . .	23
Arcade::Tile . . . . .	24
Arcade::Parsing . . . . .	17
Arcade::Core . . . . .	5
Arcade::SDLSoundObj . . . . .	19
Arcade::SDLTextureObj . . . . .	19

## Chapter 2

# Class Index

### 2.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

<a href="#">Arcade::Core</a>	5
<a href="#">DyLib&lt; T &gt;</a>	7
<a href="#">Arcade::DyLibException</a>	8
<a href="#">Arcade::DynamicTile</a>	9
<a href="#">Arcade::exception</a>	9
<a href="#">HighScore</a>	10
<a href="#">Arcade::IDisplay</a>	10
<a href="#">Arcade::IGame</a>	12
<a href="#">Arcade::IObject</a>	13
<a href="#">Arcade::MissingAsset</a>	13
<a href="#">Arcade::NCURSES</a>	14

## Chapter 3

# Class Documentation

### 3.1 Arcade::Core Class Reference

Inheritance diagram for Arcade::Core:

#### Public Member Functions

- [Core](#) (int ac, char \*\*av)
- void [prevDisplay](#) ()
- void [nextDisplay](#) ()
- void [prevGame](#) ()
- void [nextGame](#) ()
- bool [menu](#) ()

#### Additional Inherited Members

#### 3.1.1 Constructor & Destructor Documentation

##### 3.1.1.1 Core()

```
Arcade::Core::Core (  
    int ac,  
    char ** av )
```

The [Core](#) class takes the program arguments as parameters. It is the bridge between graphic libraries and games

**Parameters**

<i>ac</i>	arguments counter
<i>av</i>	arguments value

## 3.1.2 Member Function Documentation

### 3.1.2.1 menu()

```
bool Arcade::Core::menu ( )
```

Loads the menu

**Returns**

false if the user exited, true otherwise

### 3.1.2.2 nextDisplay()

```
void Arcade::Core::nextDisplay ( )
```

Loads the next graphical library available

### 3.1.2.3 nextGame()

```
void Arcade::Core::nextGame ( )
```

Loads the next game library available

### 3.1.2.4 prevDisplay()

```
void Arcade::Core::prevDisplay ( )
```

Loads the previous graphical library available

### 3.1.2.5 prevGame()

```
void Arcade::Core::prevGame ( )
```

Loads the previous game library available

The documentation for this class was generated from the following files:

- include/Core.hpp
- src/Core.cpp

## 3.2 DyLib< T > Class Template Reference

### Public Member Functions

- [DyLib](#) () noexcept=default
- [DyLib](#) (const std::string &path)
- [DyLib](#) (const [DyLib](#) &)=delete
- [DyLib](#) ([DyLib](#) &&)=delete
- [DyLib](#) & [operator=](#) (const [DyLib](#) &)=delete
- [DyLib](#) & [operator=](#) ([DyLib](#) &&)=delete
- void [loadLib](#) (const std::string &path)
- void [releaseLib](#) () noexcept
- T \* [get](#) ()

### 3.2.1 Constructor & Destructor Documentation

#### 3.2.1.1 DyLib() [1/2]

```
template<typename T >
DyLib< T >::DyLib ( ) [default], [noexcept]
```

Creates a dynamic library object

#### 3.2.1.2 DyLib() [2/2]

```
template<typename T >
DyLib< T >::DyLib (
    const std::string & path ) [inline]
```

Creates a dynamic library instance

#### Parameters

<i>template</i>	type of the entity returned by entry_point function inside library
<i>path</i>	path to the dynamic library to load (.so, .dll, .dylib)

### 3.2.2 Member Function Documentation

#### 3.2.2.1 loadLib()

```
template<typename T >
void DyLib< T >::loadLib (
    const std::string & path ) [inline]
```

Load a dynamic library into the object. If a dynamic library was already opened, it will be unload and replaced

#### Parameters

<i>template</i>	type of the entity returned by entry_point function inside library
<i>path</i>	path to the dynamic library to load (.so, .dll, .dylib)

#### 3.2.2.2 releaseLib()

```
template<typename T >
void DyLib< T >::releaseLib ( ) [inline], [noexcept]
```

Close the dynamic library currently loaded in the object. This function will be automatically called by the class destructor

The documentation for this class was generated from the following file:

- include/DyLib.hpp

## 3.3 Arcade::DyLibException Class Reference

```
#include <Exception.hpp>
```

Inheritance diagram for Arcade::DyLibException:

### Public Member Functions

- **DyLibException** (std::string error)

#### 3.3.1 Detailed Description

Exception thrown when an error occurred when loading a dynamic library at runtime. Inherits from [Arcade::exception](#)

The documentation for this class was generated from the following file:

- include/Exception.hpp

## 3.4 Arcade::DynamicTile Class Reference

```
#include <Object.hpp>
```

Inheritance diagram for Arcade::DynamicTile:

### Public Member Functions

- **DynamicTile** (const [Tile](#) &main\_tile, unsigned int recurrence=0)
- std::pair< float, float > **getPosition** () const
- unsigned int **getRotation** () const
- [Arcade::Tile](#) \* **getActualTile** ()
- void **setPosition** (float x, float y)
- void **setRotation** (unsigned int angle)
- void **addTile** (const [Arcade::Tile](#) &tile)
- void **animate** ()

#### 3.4.1 Detailed Description

Class that contains multiple tiles of size <getSize()> use animate() member to animate the tile

The documentation for this class was generated from the following file:

- include/Object.hpp

## 3.5 Arcade::exception Class Reference

```
#include <Exception.hpp>
```

Inheritance diagram for Arcade::exception:

### Public Member Functions

- **exception** (std::string error)
- const char \* **what** () const noexcept override

## Protected Attributes

- `const std::string m_error`

### 3.5.1 Detailed Description

Exception class for Arcade

The documentation for this class was generated from the following file:

- `include/Exception.hpp`

## 3.6 HighScore Class Reference

### Public Member Functions

- **HighScore** (`const std::string &file="score.txt"`)
- `void writeNewScore ()`
- `void setNewScore (std::string score)`
- `void dump ()`

The documentation for this class was generated from the following files:

- `lib/Game/include/HighScore.hpp`
- `lib/Game/src/HighScore.cpp`

## 3.7 Arcade::IDisplay Class Reference

Inheritance diagram for Arcade::IDisplay:

### Public Member Functions

- `virtual Arcade::Input event ()=0`
- `virtual void clear ()=0`
- `virtual void refresh ()=0`
- `virtual void draw (std::shared_ptr< Arcade::IObject > object)=0`

### 3.7.1 Member Function Documentation

### 3.7.1.1 clear()

```
virtual void Arcade::IDisplay::clear ( ) [pure virtual]
```

clear the screen of the current graphical library

Implemented in [Arcade::SFML](#), [Arcade::SDL](#), and [Arcade::NCURSES](#).

### 3.7.1.2 draw()

```
virtual void Arcade::IDisplay::draw (
    std::shared_ptr< Arcade::IObject > object ) [pure virtual]
```

Draw the [Arcade::IObject](#) into the current graphical library

#### Parameters

<i>object</i>	to be draw into the current graphical library
---------------	---

Implemented in [Arcade::SFML](#), [Arcade::SDL](#), and [Arcade::NCURSES](#).

### 3.7.1.3 event()

```
virtual Arcade::Input Arcade::IDisplay::event ( ) [pure virtual]
```

#### Returns

Arcade::Input that corresponds to the last event from the current graphical library

Implemented in [Arcade::SFML](#), [Arcade::SDL](#), and [Arcade::NCURSES](#).

### 3.7.1.4 refresh()

```
virtual void Arcade::IDisplay::refresh ( ) [pure virtual]
```

refresh the screen of the current graphical library

Implemented in [Arcade::SFML](#), [Arcade::SDL](#), and [Arcade::NCURSES](#).

The documentation for this class was generated from the following file:

- lib/Display/include/IDisplay.hpp

## 3.8 Arcade::IGame Class Reference

Inheritance diagram for Arcade::IGame:

### Public Member Functions

- virtual `std::vector< std::shared_ptr< Arcade::IObject > > loop` (Arcade::Input event)=0
- virtual `int getScore ()`=0
- virtual `void reset ()`=0

### 3.8.1 Member Function Documentation

#### 3.8.1.1 `getScore()`

```
virtual int Arcade::IGame::getScore ( ) [pure virtual]
```

##### Returns

the actual score of the current game library

Implemented in [Arcade::Snake](#), and [Arcade::Pacman](#).

#### 3.8.1.2 `loop()`

```
virtual std::vector<std::shared_ptr<Arcade::IObject> > Arcade::IGame::loop (
    Arcade::Input event ) [pure virtual]
```

##### Parameters

<i>event</i>	Arcade::Input event received to be processed by the game
--------------	--

##### Returns

a vector of [Arcade::IObject](#) to be draw into the current graphical library

Implemented in [Arcade::Snake](#), and [Arcade::Pacman](#).

### 3.8.1.3 reset()

```
virtual void Arcade::IGame::reset ( ) [pure virtual]
```

Reset the current game library

Implemented in [Arcade::Snake](#), and [Arcade::Pacman](#).

The documentation for this class was generated from the following file:

- lib/Game/include/IGame.hpp

## 3.9 Arcade::IObject Class Reference

```
#include <Object.hpp>
```

Inheritance diagram for Arcade::IObject:

### 3.9.1 Detailed Description

Pure virtual class that can be polymorfed into :

[Tile](#) [DynamicTile](#) [Sound](#) [Text](#)

The documentation for this class was generated from the following file:

- include/Object.hpp

## 3.10 Arcade::MissingAsset Class Reference

```
#include <Exception.hpp>
```

Inheritance diagram for Arcade::MissingAsset:

## Public Member Functions

- **MissingAsset** (std::string error)

### 3.10.1 Detailed Description

Exception thrown when a missing asset is detected at runtime. Inherits from [Arcade::exception](#)

The documentation for this class was generated from the following file:

- include/Exception.hpp

## 3.11 Arcade::NCURSES Class Reference

Inheritance diagram for Arcade::NCURSES:

## Public Member Functions

- Arcade::Input [event](#) ()
- void [clear](#) ()
- void [refresh](#) ()
- void [draw](#) (std::shared\_ptr< [Arcade::IObject](#) > object)
- void **playSound** ([Arcade::Sound](#) \*)

### 3.11.1 Member Function Documentation

#### 3.11.1.1 clear()

```
void Arcade::NCURSES::clear ( ) [virtual]
```

clear the screen of the current graphical library

Implements [Arcade::IDisplay](#).

#### 3.11.1.2 draw()

```
void Arcade::NCURSES::draw (
    std::shared_ptr< Arcade::IObject > object ) [virtual]
```

Draw the [Arcade::IObject](#) into the current graphical library

## Parameters

<i>object</i>	to be draw into the current graphical library
---------------	---

Implements [Arcade::IDisplay](#).

**3.11.1.3 event()**

```
Arcade::Input Arcade::NCURSES::event ( ) [virtual]
```

## Returns

Arcade::Input that corresponds to the last event from the current graphical library

Implements [Arcade::IDisplay](#).

**3.11.1.4 refresh()**

```
void Arcade::NCURSES::refresh ( ) [virtual]
```

refresh the screen of the current graphical library

Implements [Arcade::IDisplay](#).

The documentation for this class was generated from the following files:

- lib/Display/Ncurses/include/NCURSES.hpp
- lib/Display/Ncurses/src/NCURSES.cpp

**3.12 Arcade::Pacman Class Reference**

Inheritance diagram for Arcade::Pacman:

**Public Member Functions**

- int [getScore](#) () override
- void [reset](#) () override
- std::vector< std::shared\_ptr< [IObject](#) > > [loop](#) (Arcade::Input ev) override

### 3.12.1 Member Function Documentation

#### 3.12.1.1 `getScore()`

```
int Arcade::Pacman::getScore ( ) [inline], [override], [virtual]
```

##### Returns

the actual score of the current game library

Implements [Arcade::IGame](#).

#### 3.12.1.2 `loop()`

```
std::vector< std::shared_ptr< Arcade::IObject > > Arcade::Pacman::loop (
    Arcade::Input event ) [override], [virtual]
```

##### Parameters

<i>event</i>	Arcade::Input event received to be processed by the game
--------------	--

##### Returns

a vector of [Arcade::IObject](#) to be draw into the current graphical library

Implements [Arcade::IGame](#).

#### 3.12.1.3 `reset()`

```
void Arcade::Pacman::reset ( ) [override], [virtual]
```

Reset the current game library

Implements [Arcade::IGame](#).

The documentation for this class was generated from the following files:

- lib/Game/Pacman/include/Pacman.hpp
- lib/Game/Pacman/src/Pacman.cpp

## 3.13 Arcade::Parsing Class Reference

Inheritance diagram for Arcade::Parsing:

### Public Member Functions

- **Parsing** (int ac, char \*\*av)

### Protected Attributes

- std::vector< std::string > **m\_GameLibs** {}
- int **m\_GameLibsIterator**
- std::vector< std::string > **m\_GraphLibs** {}
- int **m\_GraphLibsIterator**
- std::string **m\_name**

The documentation for this class was generated from the following files:

- include/Parsing.hpp
- src/Parsing.cpp

## 3.14 Arcade::SDL Class Reference

Inheritance diagram for Arcade::SDL:

### Public Member Functions

- **SDL** (const [SDL](#) &)=delete
- **SDL** ([SDL](#) &&)=delete
- [SDL](#) & **operator=** (const [SDL](#) &)=delete
- [SDL](#) & **operator=** ([SDL](#) &&)=delete
- Arcade::Input [event](#) ()
- void [clear](#) ()
- void [refresh](#) ()
- void [draw](#) (std::shared\_ptr< [Arcade::!Object](#) > object)
- void **drawTile** ([Arcade::Tile](#) \*tile)
- void **playSound** ([Arcade::Sound](#) \*sound)

### 3.14.1 Member Function Documentation

#### 3.14.1.1 clear()

```
void Arcade::SDL::clear ( ) [virtual]
```

clear the screen of the current graphical library

Implements [Arcade::IDisplay](#).

#### 3.14.1.2 draw()

```
void Arcade::SDL::draw (
    std::shared_ptr< Arcade::IObject > object ) [virtual]
```

Draw the [Arcade::IObject](#) into the current graphical library

##### Parameters

<i>object</i>	to be draw into the current graphical library
---------------	---

Implements [Arcade::IDisplay](#).

#### 3.14.1.3 event()

```
Arcade::Input Arcade::SDL::event ( ) [virtual]
```

##### Returns

Arcade::Input that corresponds to the last event from the current graphical library

Implements [Arcade::IDisplay](#).

#### 3.14.1.4 refresh()

```
void Arcade::SDL::refresh ( ) [virtual]
```

refresh the screen of the current graphical library

Implements [Arcade::IDisplay](#).

The documentation for this class was generated from the following files:

- lib/Display/SDL/include/SDL.hpp
- lib/Display/SDL/src/SDL.cpp

## 3.15 Arcade::SDLSoundObj Class Reference

### Public Member Functions

- **SDLSoundObj** (const [SDLSoundObj](#) &)=delete
- **SDLSoundObj** ([SDLSoundObj](#) &&)=delete
- [SDLSoundObj](#) & **operator=** (const [SDLSoundObj](#) &)=delete
- [SDLSoundObj](#) & **operator=** ([SDLSoundObj](#) &&)=delete
- **SDLSoundObj** (const std::string &path)
- void **play** ()

### Public Attributes

- Mix\_Music \* **m\_sound**

The documentation for this class was generated from the following file:

- lib/Display/SDL/include/SDL.hpp

## 3.16 Arcade::SDLTextureObj Class Reference

### Public Member Functions

- **SDLTextureObj** (const [SDLTextureObj](#) &)=delete
- **SDLTextureObj** ([SDLTextureObj](#) &&)=delete
- [SDLTextureObj](#) & **operator=** (const [SDLTextureObj](#) &)=delete
- [SDLTextureObj](#) & **operator=** ([SDLTextureObj](#) &&)=delete
- **SDLTextureObj** (const std::string &path, SDL\_Renderer \*renderer)
- **SDLTextureObj** ([Arcade::Text](#) text, TTF\_Font \*font, SDL\_Renderer \*renderer)
- void **setPosition** (float x, float y)

### Public Attributes

- SDL\_Texture \* **m\_img** {}
- SDL\_Rect **m\_rect** {}
- SDL\_Point **m\_center** {}

The documentation for this class was generated from the following files:

- lib/Display/SDL/include/SDL.hpp
- lib/Display/SDL/src/SDL.cpp

## 3.17 Arcade::SFML Class Reference

Inheritance diagram for Arcade::SFML:

### Public Member Functions

- `Arcade::Input event ()`
- `void clear ()`
- `void refresh ()`
- `void draw (std::shared_ptr< Arcade::IObject > object)`
- `void drawTile (Arcade::Tile *tile)`
- `void playSound (Arcade::Sound *sound)`

### 3.17.1 Member Function Documentation

#### 3.17.1.1 `clear()`

```
void Arcade::SFML::clear ( ) [virtual]
```

clear the screen of the current graphical library

Implements [Arcade::IDisplay](#).

#### 3.17.1.2 `draw()`

```
void Arcade::SFML::draw (
    std::shared_ptr< Arcade::IObject > object ) [virtual]
```

Draw the [Arcade::IObject](#) into the current graphical library

##### Parameters

<i>object</i>	to be draw into the current graphical library
---------------	---

Implements [Arcade::IDisplay](#).

### 3.17.1.3 event()

```
Arcade::Input Arcade::SFML::event ( ) [virtual]
```

#### Returns

Arcade::Input that corresponds to the last event from the current graphical library

Implements [Arcade::IDisplay](#).

### 3.17.1.4 refresh()

```
void Arcade::SFML::refresh ( ) [virtual]
```

refresh the screen of the current graphical library

Implements [Arcade::IDisplay](#).

The documentation for this class was generated from the following files:

- lib/Display/SFML/include/SFML.hpp
- lib/Display/SFML/src/SFML.cpp

## 3.18 Arcade::Snake Class Reference

Inheritance diagram for Arcade::Snake:

### Public Member Functions

- int [getScore](#) () override
- void [reset](#) () override
- std::vector< std::shared\_ptr< [IObject](#) > > [loop](#) (Arcade::Input ev) override

### 3.18.1 Member Function Documentation

### 3.18.1.1 `getScore()`

```
int Arcade::Snake::getScore ( ) [inline], [override], [virtual]
```

#### Returns

the actual score of the current game library

Implements [Arcade::IGame](#).

### 3.18.1.2 `loop()`

```
std::vector< std::shared_ptr< Arcade::IObject > > Arcade::Snake::loop (
    Arcade::Input event ) [override], [virtual]
```

#### Parameters

<i>event</i>	Arcade::Input event received to be processed by the game
--------------	--

#### Returns

a vector of [Arcade::IObject](#) to be draw into the current graphical library

Implements [Arcade::IGame](#).

### 3.18.1.3 `reset()`

```
void Arcade::Snake::reset ( ) [override], [virtual]
```

Reset the current game library

Implements [Arcade::IGame](#).

The documentation for this class was generated from the following files:

- lib/Game/Snake/include/Snake.hpp
- lib/Game/Snake/src/Snake.cpp

## 3.19 Arcade::Sound Class Reference

```
#include <Object.hpp>
```

Inheritance diagram for Arcade::Sound:

## Public Member Functions

- **Sound** (std::string path)
- std::string **getSound** () const
- void **setSound** (std::string path)

### 3.19.1 Detailed Description

Class that contains a relative path to a sound file

The documentation for this class was generated from the following file:

- include/Object.hpp

## 3.20 Arcade::Text Class Reference

```
#include <Object.hpp>
```

Inheritance diagram for Arcade::Text:

## Public Member Functions

- **Text** (std::string text, Arcade::Color color=WHITE, float x=0, float y=0)
- void **setText** (std::string text)
- void **setColor** (Arcade::Color color)
- void **setPosition** (float x, float y)
- std::string **getText** () const
- Arcade::Color **getColor** () const
- std::pair< float, float > **getPosition** () const

### 3.20.1 Detailed Description

Class that contains text to be displayed

The documentation for this class was generated from the following file:

- include/Object.hpp

## 3.21 Arcade::Tile Class Reference

```
#include <Object.hpp>
```

Inheritance diagram for Arcade::Tile:

### Public Member Functions

- **Tile** (std::string path\_to\_bmp, unsigned char symbol, Arcade::Color color=WHITE, float x=0, float y=0)
- std::string **getPath** () const
- unsigned char **getSymbol** () const
- Arcade::Color **getColor** () const
- std::pair< float, float > **getPosition** () const
- unsigned int **getRotation** () const
- void **setPath** (std::string path\_to\_bmp)
- void **setSymbol** (unsigned char symbol)
- void **setColor** (Arcade::Color color)
- void **setPosition** (float x, float y)
- void **setRotation** (unsigned int angle)

### 3.21.1 Detailed Description

Class that contains a tile of size <getTileSize()>

The documentation for this class was generated from the following file:

- include/Object.hpp

# Index
